Strong - Plain and Simple

Effective April 1st, 2019, CONTI® V FO PIONEER belts will be available in lengths between 3,000 mm and 5,000 mm, rounding off the length range. This development has been made possible by the new Agri Cell production system in Hanover. Based on a new EPDM design, the transversely stiff raw-edge heavy-duty V-belt can be used in almost any industrial application. The CONTI® V FO PIONEER will therefore replace the CONTI® V FO ADVANCE.

- › High, long-term power transmission
- › Maintenance-free
- › Temperature-resistant from -40°C to +130°C
- › Durable thanks to a more hard-wearing compound
- › Low-PAC: Category 2 to AfPS-GS-2014-01-PAK

Orders will be accepted from now on.
Deliveries commencing on 1st of April
